Milky Mist Dairy Food Limited

(Formerly Known as "Milky Mist Dairy Food Private Limited")

Notes to the Special Purpose Consolidated Financial Information for the year ended 31st March 2023

(Amount in million of INR unless otherwise stated)

1.01 Corporate Information:

Milky Mist Dairy Food Limited (Formerly known as Milky Mist Dairy Food Private Limited (MMDFPL)) was a private limited company domiciled in Erode, India incorporated on 10th July, 2014 under the provisions of Companies Act, 2013('the Act'). The Company is engaged in the business of procurement of milk, undertakes processing of milk and manufacture of various value added products namely paneer, cheese, curd, butter, ghee, fresh cream, milk powder, flavoured milk, lassi etc. which are marketed under its brand name "Milky Mist". The registered office of the Company is situated at SF. No. 43/1-4, Pattakaranpalayam, Perundurai, Erode, Tamil Nadu - 638057.

Company considered in Special Purpose Consolidated Ind AS Financial Statements: Asal Food Products Private Limited whose country of incorporation is India.

The Company and its wholly owned subsidiary included in these Special Purpose Consolidated Ind AS Financial Statements are together referred to as 'the Group'.

MMDFPL was converted into a public limited company w.e.f 26 May 2025. Consequent to the conversion, the name of the Company has been changed to "Milky Mist Dairy Food Limited" ('MMDFL' or 'the Company'). The Company and its wholly owned subsidiary included in these Special Purpose Consolidated Ind AS Financial Statements are together referred to as 'the Group'.

1.02 BASIS OF PREPARATION, MEASUREMENT AND MATERIAL ACCOUNTING POLICIES

Basis of Preparation and measurement:

Statement of Compliance:

Special Purpose Consolidated Ind AS financial statements of the Company comprises the Special Purpose Consolidated Balance Sheet as at 31st March 2023, the Special Purpose Consolidated Statement of Profit & Loss (including other comprehensive income), Special Purpose Consolidated Statement of changes in Equity and the Special Purpose Consolidated Statement of Cash flows for the year ended 31st March 2023, the summary of material accounting policies and Explanatory Notes ("Collectively - Special Purpose Consolidated Ind AS Financial Statements")

The group has prepared financial statements as required by the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulation, 2018 as amended ("ICDR Regulation") issued by the Securities and Exchange Board of India ("SEBI") in pursuance of the Securities and Exchange Board of India Act 1992 and Section 26 of Part I of Chapter III of the Companies act 2013 ("The Act") for the purpose of inclusion in the Draft Red Herring Prospectus ("DRHP"), Red Herring Prospectus ("RHP") and Prospectus (the DRHP, the RHP and the Prospectus collectively herein after called as Offering Document)/preparation and presentation of Consolidated Financial Statement of the Parent Company i.e Milky Mist Dairy food Limited (Formerly Milky Mist Dairy Private Limited) in connection with the proposed initial Public offering of Equity Shares of face value of Rs.2 each of the Company comprising of fresh issue of Equity Shares ("IPO").

SEBI mandates companies to furnish financial statement prepared in accordance with Indian Accounting Standard ("Ind AS") for all the three previous years and stub period. Accordingly, the group has prepared these Special Purpose Consolidated Ind AS financial Statements for the year ended 31st March 2024. These Special Purpose Consolidated Ind AS financial statements are not the Statutory Financial statements of the Company and do not include all the disclosures applicable to Statutory financial statements prepared under the Companies Act 2013.

Until financial year ended March 31, 2023, the Company prepared only Standalone Financial Statements. During the period ended March 31, 2025, the Company acquired controlling stake in its subsidiary, which were under common control (refer note 49 for further details) and is preparing Consolidated Financial Statements for the first time for the year ended March 31, 2023. Considering the requirement of SEBI as mentioned above, the Company prepared Special Purpose Consolidated Ind AS financial Statements for the years ended March 31, 2023.

Pursuant to the Companies (Indian Accounting Standard) Second amendment Rules, 2015, as amended, the group will prepare its first set of Consolidated Statutory financial statements as per Indian Accounting Standard (Ind AS) notified under the Companies (Indian Accounting Standard) Rules, 2015, as amended from time to time for the year ended 31st March 2025 and consequently 1st April 2023 is the transition date for preparation of such Consolidated Statutory financial statements. The consolidated financial statement for the year ending 31st March 2025 would be the first financial statement prepared in accordance with Ind AS. Up to the financial year ended 31st March 2024, the group prepared its statement in accordance with Accounting Standard prescribed u/s. 133 of the companies Act, 2013 ("Indian Gaap"). The Special Purpose Consolidated Ind AS financial statements for the year ended 31st march 2023 have been prepared after making suitable adjustments to the accounting heads from the "Indian GAAP" values following Accounting Policies (both mandatory exception and optional exemptions) availed as per Ind AS 101 for the transition date of 1st April and as per the presentation, Accounting Policies and grouping/classifications including amended Schedule III disclosure to the extent applicable. The Special Purpose Consolidated Ind AS financial statements were approved by the Board of Directors on 15.07.2025

The Special Purpose consolidated financial statements have been prepared on going concern basis in accordance with accounting principles generally accepted in India. The presentation of Special Purpose consolidated financial statement is based on Ind AS Schedule III of the Companies Act, 2013.

The Special Purpose consolidated financial statements have been prepared & presented on the historical convention and on accrual basis, except for the following material items in the Balance Sheet:

- Financial assets and liabilities are measured either at fair value or at amortised cost depending on the classification; and
- Employee defined benefit assets/ (liability) are recognised as the net total of the fair value of plan assets, plus actuarial losses, less actuarial gains and the present value of the defined benefit obligation.
- Long term borrowings are measured at amortised cost using the effective interest rate method;
- right-of-use the assets are recognised at the present value of lease payments that are not paid at that date. This amount is adjusted for any lease payments made at or before the commencement date, lease incentives received and initial direct costs, incurred, if any.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The Group has consistently applied the following accounting policies throughout the periods presented in these Consolidated Financial Information.

Milky Mist Dairy Food Limited

(Formerly Known as "Milky Mist Dairy Food Private Limited")

Notes to the Special Purpose Consolidated Financial Information for the year ended 31st March 2023

(Amount in million of INR unless otherwise stated)

1.03 Basis of Consolidation:

The Group determines the basis of control in line with the requirements of Ind AS 110- Consolidated Financial Statements. The Consolidated Financial Information comprise the special purpose financial statements of the Company and its subsidiary as disclosed in Note 1.

Subsidiaries

Subsidiaries are all entities (including special purpose entities) that are controlled by the Parent Company. Control exists when the Parent Company is exposed to or has rights to variable returns from its involvement with the entity and has the ability to affect those returns through power over the entity. In assessing control, potential voting rights are considered only if the rights are substantive. The special purpose financial statements of subsidiaries are included in these Consolidated financial information from the date that control commences until the date that control ceases. The Group re-assesses whether or not it controls an entity if facts and circumstances indicate that there are changes to one or more of the three elements of control.

Consolidation procedure:

(a) Combine like items of assets, liabilities, equity, income, expenses and cash flows of the Parent Company with those of its subsidiaries. For this purpose, income and expenses of the subsidiaries are based on the amounts of the assets and liabilities recognised in the Consolidated financial information at the acquisition date.

(b) Offset (eliminate) the carrying amount of the parent's investment in each of subsidiaries and the parent's portion of equity of each subsidiary.

(c) Eliminate in full intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between entities of the Group (profits or losses resulting from intragroup transactions that are recognised in assets, such as inventory, are eliminated in full).

Intragroup losses may indicate an impairment that requires recognition in the consolidated financial statements. Ind AS12 Income Taxes applies to temporary differences that arise from the elimination of profits and losses resulting from intragroup transactions.

Profit or loss and each component of other comprehensive income (OCI) are attributed to the equity holders of the parent of the Group.

The Special Purpose Financial Statements of the entity used for consolidation are drawn up to the same reporting date.

1.04 Business combinations accounting for common control transactions:

Common control business combination refers to a business combination involving entities in which all the combining entities are ultimately controlled by the same party or parties both before and after the business combination, and that control is not transitory. Business combinations involving entities or businesses under common control have been accounted for using the pooling of interest method.

The assets and liabilities of the combining entities are reflected at their carrying amounts. No adjustments have been made to reflect fair values, or to recognise any new assets or liabilities. The financial information in the Consolidated Financial Information in respect of prior periods have been restated as if the business combination had occurred from the beginning of the earliest period presented in these Consolidated Financial Information, irrespective of the actual date of the combination. However, if business combination had occurred after that date, the prior period information has been restated only from that date.

The difference, if any, between the purchase consideration paid either in the form of share capital or cash or other assets and the amount of net assets of the entities acquired is transferred to capital reserve in case of credit balance and common control adjustment deficit account in case of debit balance and presented separately from other reserves within equity. The nature and purpose of such reserve is disclosed in the notes.

1.05 Functional and presentation currency

These Consolidated financial information are presented in Indian Rupees (₹), which is also the Group's functional currency. All amounts have been rounded-off to the nearest million, unless otherwise indicated.

1.06 Use of estimates and judgements

The preparation of Financial Statements is in conformity with Indian Accounting Standards which require the management of the Company to make judgements, estimates and assumptions that affect the reported amount of revenues, expenses, assets and liabilities and disclosure of contingent liabilities at the end of the reporting period. Although these estimates are based upon the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future period. Appropriate changes in estimates are made as management becomes aware of changes in circumstances surrounding the estimates. Application of accounting policies that require significant accounting estimates involving complex and subjective judgments and the use of assumptions in these Financial Statements have been disclosed separately under the heading "Significant accounting Judgements, estimates and assumption".

1.07 Operating Cycle

Operating cycle is the time between the acquisition of assets for processing and their realization in cash or cash equivalents. The Group has ascertained its operating cycle being a period of 12 months for the purpose of classification of assets and liabilities into current and non-current. Accordingly, current assets do not include elements which are not expected to be realised within 12 months and current liabilities do not include items where the Group does not have an unconditional right to defer settlement beyond a period of 12 months, the period of 12 months being reckoned from the reporting date.

Material Accounting Policy Information

Material accounting policy information This note provides a list of the material accounting policies adopted in the preparation of these Consolidated Financial Information.

1.08 Property, Plant and Equipment

Property, Plant and Equipment (PPE), being fixed assets are tangible items that are held for use in the production or supply of goods or services, or for administrative purposes and are expected to be used for more than a period of twelve months.

Freehold land is carried at cost. All other items of Property, Plant and Equipment (PPE) are measured at cost, less accumulated depreciation and accumulated impairment losses, if any. Financing costs (if any) relating to acquisition of assets which take substantial period of time to get ready for intended use are also included to the extent they relate to the period up to such assets are ready for their intended use.

Initial cost of an item of PPE comprises its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates, any directly attributable cost of bringing the item to its location and working condition necessary for it to be capable of operating in the manner intended by the Management and estimated costs of dismantling and removing the item and restoring the site on which it is located.

Items such as spare parts, stand-by equipment and servicing equipment are capitalized when they meet the definition of Property, Plant and Equipment.

If significant parts of an item of PPE have different useful lives, then they are accounted for as separate items (major components) of PPE.

The carrying amount of an item of PPE is derecognised on disposal or when no future economic benefits are expected from its use or disposal. The gain/ loss arising from derecognition of an item of PPE is included in the statement of Profit & Loss. The gain or loss arising from the derecognition of an item of PPE would be the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Subsequent costs and disposal: Subsequent expenditure related to an item of PPE is added to its book value only if it increases the future economic benefits from the existing asset beyond its previously assessed standard of performance/life.

All other expenses on existing PPE, including day-to-day repair and maintenance expenditure and cost of replacing parts, are charged to the statement of profit and loss for the period during which such expenses are incurred.

Advances paid towards the acquisition of property, plant and equipment outstanding at each balance sheet date is classified as capital advances under other non-current assets and the cost of assets not put to use before such date are disclosed under 'Capital work-in-progress'.

Depreciation: Depreciation on PPE are provided under Straight line method by the holding company and Written down value method by the subsidiary company as per the useful lives and manner prescribed under Schedule II to the Companies Act, 2013

The Management believes that the estimated useful lives as per the provisions of Schedule II to the Companies Act, 2013, wherever adopted, are realistic and reflect fair approximation of the period over which the assets are likely to be used. Depreciation on assets is provided using the straight line method by the holding company and Written down value method by the subsidiary company based on rates specified in Schedule II to the Companies Act, 2013 or on estimated useful lives of assets estimated by the management.

Leasehold Improvements thereon are amortised over the primary period of lease or Estimated Useful Life whichever is lower.

S.No	Asset Category	Estimated Useful Life (Years)	Useful Life as per Schedule II of Companies Act, 2013
1	Building		
-	Factory	30 Years	30 Years
-	Other than Factory	60 Years	60 Years
2	Improvements to Leasehold Building	Term of Lease or Estimated Useful Life whichever is lower	
3	Plant and Equipments		
-	Power Generation Plant	22 Years	22 Years
-	Plant & Machinery	10 Years on double shift basis/15 years	10 Years on double shift basis/15 Years
-	Crates	3 Years	15 Years
4	Electrical Equipment	10 Years	10 Years
5	Computer	3 Years	3 Years
6	Computer Server	6 Years	6 Years
7	Furniture & Fixtures	10 Years	10 Years
8	Office Equipment	5 Years	5 Years
9	Vehicles		
-	Two Wheeler	10 Years	10 Years
-	Four Wheelers	8 Years/ 10 Years	8 Years

The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, if there has been a significant change in the expected pattern of consumption of future economic benefits embodied in the asset, depreciation is charged prospectively to reflect the changed pattern.

Milky Mist Dairy Food Limited

(Formerly Known as "Milky Mist Dairy Food Private Limited")

Notes to the Special Purpose Consolidated Financial Information for the year ended 31st March 2023

(Amount in million of INR unless otherwise stated)

1.09 Investment Property

Investment Property acquired by the group is a land or building, held to earn rentals or for capital appreciation or both, rather than for use in the production or supply of goods or services or for administrative purposes; or sale in the ordinary course of business.

Investment properties, are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at cost less accumulated depreciation and accumulated impairment loss, if any. The building components of Investment properties (if any) are depreciated using the straight-line method over their estimated useful lives.

1.10 Intangible Assets and Amortisation

Intangible assets acquired separately by the group are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses. Computer software licenses are capitalised on the basis of costs incurred to acquire and bring to use the specific software. Operating software is capitalised and amortised along with the related fixed asset.

Intangible assets are recognised only if it is probable that future economic benefits that are attributable to the asset will flow to the enterprise and the cost of the asset can be measured reliably.

Amortisation is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

All the Intangible assets are amortised over a period of 6 years.

Gains or losses arising from de-recognition of intangible assets are measured as the difference between the net disposal proceeds and the carrying amounts of the assets and are recognised in the Consolidated statement of Profit and Loss when the assets are derecognised.

1.11 Lease

As a lessee

The Group's lease asset classes primarily consist of leases for land and buildings. The Group assesses whether a contract contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Group assesses whether:

- (i) the contract involves the use of an identified asset
- (ii) the Group has substantially all of the economic benefits from the use of the asset throughout the period of the lease and
- (iii) the Group has the right to direct the use of the asset.

At the date of commencement of the lease, the Group recognizes a right-of-use (ROU) asset and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of 12 months or less (short-term leases) and low value leases. For these short term and low-value leases, the Group recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

Certain lease arrangements includes the options to extend or terminate the lease before the end of the lease term. ROU assets and lease liabilities includes these options when it is reasonably certain that they will be exercised. The ROU assets are initially recognized at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives. They are subsequently measured at cost less accumulated depreciation and impairment losses.

ROU assets are depreciated from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset. ROU assets are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the Cash Generating Unit (CGU) to which the asset belongs.

The lease liability is initially measured at amortized cost at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lease or, if not readily determinable, using the incremental borrowing rates. Lease liabilities are remeasured with a corresponding adjustment to the related ROU asset if the Company changes its assessment of whether it will exercise an extension or a termination option.

Lease liability and ROU assets have been separately presented in the Balance Sheet and lease payments have been classified as financing cash flows.

Company as a lessor

Assets subject to operating leases are included in PPE. Lease income on an operating lease is recognised in the statement of profit and loss on a straight line basis over the term of the relevant lease except to the extent that the lease payments are structured to compensate for the expected inflationary cost. Costs including depreciation are recognised as an expense in the statement of profit and loss.

1.12 Inventories

Inventories are valued at the lower of cost and net realisable value. Costs incurred in bringing each product to its present location and condition are accounted for as follows:

Raw material and packing Material: Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on FIFO basis.

Finished goods and work in progress: cost includes cost of direct materials, labour and a proportion of manufacturing overheads based on the normal operating capacity, but excluding borrowing costs.

Stores and Spares: Cost is determined on weighted average basis.

Due allowance is estimated and made by the Management for slow moving/non-moving items of inventory, where ever necessary, based on the technical assessment and such allowances are adjusted against the closing inventory value. Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

1.13 Cash and Cash Equivalents

Cash and cash equivalents in the Balance Sheet comprise cash at banks and on hand, demand deposits and short-term, highly liquid investments that are readily convertible to known amount of cash and which are subject to an insignificant risk of changes in value.

1.14 Government Grants and Export Benefits

Government grants are recognised where there is reasonable assurance that the grant will be received and all attached conditions will complied with. When the grant or subsidy relates to revenue, it is recognised as income or is adjusted against the related cost on a systematic basis in profit or loss over the periods necessary to match them with the related costs, which they are intended to compensate.

Where Grant related to specific fixed assets are presented in the Balance sheet by showing such grant as deduction from the carrying amount of asset concerned

1.15 Financial Instruments

Financial assets and financial liabilities are recognised when the Group becomes a party to the contract embodying the related financial instruments.

Financial assets

Initial recognition and measurement

All financial assets are recognized initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. However, trade receivables and current accounts that do not contain a significant financing component are measured at transaction price

Subsequent measurement

Financial assets are subsequently measured at amortised cost if these financial assets are held within a business model whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial Liabilities

Initial recognition and Subsequent measurement:

Financial liabilities are initially measured at fair value, net of transaction costs .The measurement of financial liabilities depends on their classification, as described below:

Loans and borrowings:

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortized cost using the Effective Interest Rate (EIR) method. Gains and losses are recognized in profit or loss when the liabilities are de-recognized as well as through the EIR amortization process. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the statement of profit and loss.

Trade and other payables:

These amounts represent liabilities for goods or services provided to the Company which are unpaid at the end of the reporting period. Trade and other payables are presented as current liabilities when the payment is due within a period of 12 months from the end of the reporting period. For all trade and other payables classified as current, the carrying amounts approximate fair value due to the short maturity of these instruments. Other payables falling due after 12 months from the end of the reporting period are presented as non-current liabilities and are measured at amortized cost unless designated as fair value through profit and loss at the inception.

Fair value measurement

The Group measures financial instruments at fair value at each Balance Sheet date. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs. All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1: Quoted (unadjusted) market prices in active markets for identical assets or liabilities;

Level 2: Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable, or

Level 3: Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognized in the Special Purpose Financial Statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

1.16 Foreign Currencies

The Consolidated financial information are presented in ₹ in million, which is also the Group's functional currency.

Foreign currency transactions

Transactions in foreign currencies are initially recorded by the Group at their respective functional currency spot rates at the date the transaction first qualifies for recognition. However, for practical reasons, the Group uses average rate if the average approximates the actual rate at the date of the transaction.

In preparing the Consolidated financial information of the Group, transactions in currencies other than the entity's functional currency (foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are restated at the rates prevailing at that date.

Exchange differences arising on settlement/restatement of foreign currency monetary assets and liabilities of the Group are recognized as income or expense in the Statement of Profit and Loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items carried at fair value that are denominated in foreign currencies are translated at the rates prevailing at the date when the fair value was determined.

1.17 Revenue Recognition

Revenue is measured at the fair value of the consideration received or receivable. Revenue is measured based on at the amount of transaction price (net of variable consideration) allocated to that performance obligation. The transaction price of goods sold and services rendered is net of variable consideration on account of customer return, various discounts, rebates, schemes offered by the group as a part of the contract. The Group recognises revenue when it transfers control of product or service to a customer.

Revenues and costs relating to sales contracts are recognised as the related goods are delivered, and titles have passed, at which time all the following conditions are satisfied :-

- the group has transferred to the buyer the control over the goods;
- the group retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the company ; and
- the costs incurred or to be incurred in respect of the transactions can be measured reliably.

The Group accounts for discounts and schemes related pricing incentives to customers as a reduction of revenue based on the rateable allocation of the discounts/ incentives to each of the underlying performance obligation that corresponds to the progress by the customer towards earning the discount/ incentive.

Other Operating Revenues comprise of income from ancillary activities incidental to the operations of the Company and is recognised when the right to receive the income is established as per the terms of the contract.

Interest Income:

Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset or shorter period, where appropriate to the gross carrying amount of the financial asset or to the amortized cost of a financial asset.

When calculating the effective interest rate, the company estimates the expected cash flows by considering all the contractual terms of the financial instrument but does not consider the expected credit losses. Interest income is included in other income in the statement of profit and loss. The expected cash flows are reassessed on a yearly basis and changes, if any, are accounted prospectively.

1.18 Employee Benefits

Retirement benefit costs and termination benefits:

(i) Defined Contribution Plan: A defined contribution plan is a post-employment benefit plan under which the group pays specified contributions to a separate entity. The group makes specified monthly contributions towards Provident Fund and Employee State Insurance. The group contribution is recognized as an expense in the Statement of Profit and Loss during the period in which the employee renders the related service. Payments to defined contribution retirement benefit plans are recognised as an expense when employees have rendered service entitling them to the contributions.

(ii) Defined Benefit Plan: The cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period. Re-measurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding interest), is reflected immediately in the statement of financial position with a charge or credit recognised in other comprehensive income in the period in which they occur. Re-measurement recognised in other comprehensive income is reflected immediately in retained earnings and will not be reclassified to profit or loss.

Past service cost is recognised in profit or loss in the period of a plan amendment.

Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability or asset. Defined benefit costs are categorised as follows:

- a) service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements);
- b) net interest expense or income; and
- c) re-measurement

The group presents the first two components of defined benefit costs in profit or loss in the line item 'Employee benefits expenses'. Curtailment gains and losses are accounted for as past service costs.

The retirement benefit obligation recognised in the statement of financial position represents the actual deficit or surplus in the Company's defined benefit plans. The group presents the above liability/(asset) as current and non-current in the Balance Sheet as per actuarial valuation by the independent actuary and also considering whether the holding company will contribute this amount to the gratuity fund within the next twelve months.

A liability for a termination benefit is recognised at the earlier of when the entity can no longer withdraw the offer of the termination benefit and when the entity recognises any related restructuring costs.

Short-term and other long-term employee benefits:

A liability is recognised for benefits accruing to employees in respect of wages and salaries, annual leave and sick leave in the period the related service is rendered at the undiscounted amount of the benefits expected to be paid in exchange for that service.

Liabilities recognised in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related service. Liabilities recognised in respect of other long-term employee benefits are measured at the present value of the estimated future cash outflows expected to be made by the group in respect of services provided by employees up to the reporting date.

1.19 Borrowing Costs

Borrowing cost includes interest expense as per Effective Interest Rate (EIR) and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost.

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

1.20 Earnings Per Share

Basic earnings per share is computed by dividing the profit / (loss) after tax attributable to equity shareholders by the weighted average number of equity shares outstanding during the year. The weighted average number of equity shares outstanding during the period is adjusted for events such as bonus issue, and share split that have changed the number of equity shares outstanding, without a corresponding change in resources.

Diluted earnings per share is computed by dividing the profit/(loss) after tax as adjusted for dividend, interest and other charges to expense or income (net of any attributable taxes) relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares.

Milky Mist Dairy Food Limited

(Formerly Known as "Milky Mist Dairy Food Private Limited")

Notes to the Special Purpose Consolidated Financial Information for the year ended 31st March 2023

(Amount in million of INR unless otherwise stated)

1.21 Taxation

Income tax expense represents the sum of the current tax and deferred tax.

Current Income Tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date. Current income tax relating to items recognized directly in equity is recognized in other comprehensive income/equity and not in the statement of profit and loss. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred Tax

Deferred tax is provided, using the balance sheet method, on all deductible temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes and on carry forward of unused tax credits and unused tax loss. Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date. Tax relating to items recognized outside profit or loss is recognised outside profit or loss (either in other comprehensive income or equity).

Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised. The carrying amount of deferred tax assets (including Minimum Alternate Tax credit available) is reviewed at each reporting date and accumulated MAT credit will be derecognised in the year in which the company exercises its option, if any, available under the provisions of the Income tax Act whereby it would be advantageous for the company to avail certain concessions foregoing the MAT credit adjusted to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the asset to be recovered. Unrecognized deferred tax assets are re-assessed at each reporting date and are recognized to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

1.22 Provisions

Provisions are recognised when the group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Group expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

1.23 Significant accounting Judgements, Estimates and Assumptions

In the course of applying the policies outlined in all notes as above, the Group is required to make judgements, estimates and assumptions about the carrying amount of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future period, if the revision affects current and future period.

The following are the areas of estimation uncertainty and critical judgements that the management has made in the process of applying the Company's accounting policies:

a) Useful Lives of Property, Plant and Equipment

Management reviews the useful lives of property, plant and equipment at least once a year. Such lives are dependent upon an assessment of both the technical lives of the assets and also their likely economic lives based on various internal and external factors including relative efficiency and operating costs. Accordingly, depreciable lives are reviewed annually using the best information available to the Management.

b) Provisions and Contingencies

Provisions and liabilities are recognized in the period when it becomes probable that there will be a future outflow of funds resulting from past operations or events that can reasonably be estimated. The timing of recognition requires application of judgement to existing facts and circumstances which may be subject to change. The amounts are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

c) Taxes

Deferred tax assets are recognized for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilized. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

d) Allowances for Uncollected accounts receivable and advances

Trade receivables do not carry interest and are stated at their normal value as reduced by appropriate allowances for estimated irrecoverable amounts. Individual trade receivables are written off when management deems them not collectable. Impairment is made on the expected credit loss model, which is the present value of the cash shortfall over the expected life of the financial assets. The impairment provisions for financial assets are based on assumption about the risk of default and expected loss rates. Judgement in making these assumptions and selecting the inputs to the impairment calculation are based on past history, existing market condition as well as forward looking estimates at the end of each reporting period.

*Retained Earnings include an amount of Rs. 850.20 million (net of taxes) on account of Fair Valuation of Land as on the date of transition to Ind AS. This amount is not available for distribution of dividend.

Nature & purpose of reserves

a) Retained earnings

Retained earnings are the profits that the Group has earned till date, less any dividends or other distribution to the shareholders.

b) Common control adjustment deficit account

Common control adjustment deficit account represents excess of consideration paid over the book value of the net assets and reserves taken over in a common control business combination after adjusting the opening reserves of the combined entity (Refer Note No: 49)

c) Securities premium

Securities premium is used to record the premium on issue of shares. The reserve is utilised in accordance with the provisions of Section 52 of the Companies Act, 2013.

d) General Reserve

The reserve arises on transfer portion of the net profit pursuant to the earlier provisions of Companies Act 1956. Mandatory transfer to general reserve is not required under the Companies Act 2013.

41 Tax expense

The Holding Company has paid income tax as per Section 115JB of the Income-tax Act, 1961 for measurement of its income tax expense and accordingly continued to recognise its income tax expense at the prescribed domestic effective tax rate of 34.944%.
The Subsidiary (Asal Food Products Private Limited) has paid income tax as per Section 115BAA of the Income Tax Act, 1961 for measurement of its income tax expense and accordingly continued to recognise its income tax expense at the prescribed domestic effective tax rate of 27.82%.
The major components of income tax expense and the reconciliation between expected tax expense based on the domestic effective tax rate and the reported tax expense in the statement of profit and loss is as follows:

Reconciliation of tax expense and the accounting profit multiplied by India's domestic tax rate:

Particulars	For the year ended 31st March 2023
Profit / (Loss) for the year	634.71
Current tax	
Tax at the Indian tax rate of 34.94%	216.28
Tax at the Indian tax rate of 27.82%	4.54
Deferred tax	
Attributable to-	
Disallowances under Income Tax	5.57
Temporary Differences	145.80
Others	0.34
Income tax expense reported in the statement of profit or loss	372.53

MAT Credit availment:

The management is contemplating to migrate to the new tax regime u/s 115BAA wherein the Company would be paying a lower tax rate of 25.16% as against 34.94%. Considering the uncertainty in utilization of MAT credit on account of the above, MAT credit of ₹ 116.2 million has not been recognized during the year.

b. Income tax recognised in other comprehensive income

Financial instruments

i) Fair Value Hierarchy

Financial assets and financial liabilities are measured at fair value in the Special Purpose Financial Statement and are grouped into three levels of a fair value hierarchy.

The three levels are defined based on the observability of significant inputs to the measurement, as follows:

Level 1 : Quoted prices (unadjusted) in active markets for financials instruments.

Level 2 : Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3: Unobservable inputs for the asset or liability.

ii. The carrying value of the financial instruments by categories and the value based on hierarchy as on 31st March, 2023 were as follows:

Particulars	Note No.	Level	Carrying value 31 March 2023
Financial assets			
At Amortized Cost			
Trade receivables	11	3	702.77
Cash and cash equivalents	12	3	90.17
Bank balances other than Cash & Cash Equivalents	13	3	37.05
Other financial assets	14,7	3	92.34
Total assets			922.33
Financial liabilities			
Trade payables	27	3	285.98
Borrowings	19,25	3	7,980.64
Lease Liabilities	20,26	3	57.03
Other financial liabilities	21,28	3	1,041.35
Total liabilities			9,365.00

iii. The management assessed that the fair value of cash and cash equivalents, trade receivables, loans, other financial assets, trade payables and other financial liabilities approximate the carrying amount largely due to short-term maturity of these instruments. The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

iv. There have been no transfers between Level 1, Level 2 & Level 3 during the period.

46 Financial instruments - Risk management

The Group's activities expose it to credit risk, liquidity risk and market risk. The Group's Board of Directors has overall responsibility for the establishment and oversight of the Group's risk management framework. This note explains the sources of financial risk which the entity is exposed to and how the entity manages the risk and the related impact in the special purpose financial statements.

Risk	Exposure arising from	Measurement
Credit risk	Cash and cash equivalents, trade receivables, financial assets measured at amortised cost.	Ageing analysis, Credit ratings
Liquidity risk	Borrowings and other liabilities	Rolling cash flow forecasts
Market risk - Interest rate risk	Borrowings at variable rates	Cash flow forecasting, Sensitivity analysis
Market risk - Financial Currency Risk	Adverse movements in the exchange rate between the Rupee and any relevant foreign currency	Internal Foreign Currency Exposure and risk management policy

(a) Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Group's receivables from customers and investment securities. Credit risk arises from cash held with banks and financial institutions, as well as credit exposure to clients, including outstanding accounts receivable. The maximum exposure to credit risk is equal to the carrying value of the financial assets. The objective of managing counterparty credit risk is to prevent losses in financial assets. The Group assesses the credit quality of the counterparties, taking into account their financial position, past experience and other factors.

Credit risk management

Credit risk rating

The Group assesses and manages credit risk of financial assets based on following categories arrived on the basis of assumptions, inputs and factors specific to the class of financial assets.

- A: Low credit risk
B: Moderate credit risk
C: High credit risk

Asset group	Description of category	Provision for expected credit loss*
Low Credit risk	Assets where the counter-party has strong capacity to meet the obligations and where the risk of default is negligible or nil	12 month expected credit loss / life time expected credit loss
Moderate Credit risk	Assets where the probability of default is considered moderate, where the capacity of the counter party to meet the obligations is not strong	12 month expected credit loss / life time expected credit loss
High Credit risk	Assets where there is a high probability of default	12 month expected credit loss / life time expected credit loss

* Life time expected credit loss (if required) is provided for trade receivables and for those financial assets where the credit risk has increased significantly, since the initial recognition.

Based on business environment in which the Group operates, a default on a financial asset is considered when the counterparty fails to make payments within the agreed time period as per contract. Loss rates reflecting defaults are based on actual credit loss experience and considering differences between current and historical economic conditions.

Assets are written off when there is no reasonable expectation of recovery, such as a debtor declaring bankruptcy or litigation decided against the Group. The Group continues to engage with parties whose balances are written off and attempts to enforce repayment. Any subsequent recoveries made are recognised in statement of profit and loss.

Milky Mist Dairy Food Limited
(Formerly Known as "Milky Mist Dairy Food Private Limited")
Notes to the Special Purpose Consolidated Financial Information for the year ended 31st March 2023
(Amount in million of INR unless otherwise stated)

₹ in million

Classification of Financial assets among risk categories:
As at 31st March 2023

Credit rating	Particulars	Gross Carrying Amount	Expected Credit Losses	Carrying Amount net of Provision
Low credit risk	Cash and cash equivalents, other bank balances, current investments, loans, trade receivables and other financial assets	1,004.01	(81.68)	922.33
Moderate credit risk	Nil	-	-	-
High credit risk	Nil	-	-	-

(b) Liquidity risk

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they become due. The objective of liquidity risk management is to maintain sufficient liquidity and ensure that funds are available for use as per requirement.

The processes and policies related to such risks are overseen by the Group's Board of Directors.

The table below provides details regarding the contractual maturities of significant financial liabilities As at 31st March 2023

₹ in million

Particulars	Carrying Value	On Demand	Less than 1 year	1 to 5 years	more than 5 years	Total
As at 31st March 2023

48 Employee Benefits

Refer Note no 1.18 of Material Accounting Policies

A. Defined contribution plans

The Company makes contributions towards provident fund, National Pension Scheme and employee's state insurance as a defined contribution retirement benefit fund for qualifying employees. The provident fund is operated by the regional provident fund commissioner. The National Pension Scheme is maintained by Pension Fund regulatory and Development Authority. The Employees state insurance is operated by the Employees State Insurance Corporation. Under these schemes, the Company is required to contribute a specific percentage of the payroll cost as per the statute.

The Company recognised the following contributions in the Statement of profit and loss

Particulars	2022-23
Employer's Contribution to Provident Fund	17.02
Employer's Contribution to Employees State Insurance	2.02
Total	19.04

B. Defined benefit plans

In accordance with the Payment of Gratuity Act, 1972, the Company provides for gratuity, as defined benefit plan. The gratuity plan provides for a lump sum payment to the employees at the time of separation from the service on completion of vested year of employment (i.e.) five years. The liability of gratuity plan is provided based on actuarial valuation as at the end of each financial year based on which the Company contributes the ascertained liability to a Trust Fund set up with Life Insurance Corporation of India with whom the plan assets are maintained.

These plans typically expose the Company to actuarial risks such as: investment risk, interest rate risk, salary risk and longevity

Investment Risk: The present value of the defined benefit plan liability (denominated in Indian Rupee) is calculated using a discount rate which is determined by reference to market yields at the end of the reporting period on government bonds.

Interest Risk: A decrease in the bond interest rate will increase the plan liability; however, this will be partially offset by an increase in the return on the plan's debt investments.

Salary Risk: The present value of the defined benefit plan liability is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the plan's liability.

Longevity Risk: The present value of defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and after their employment. An increase in the life expectancy of the plan participants will increase the plan's liability.

a) Principal actuarial assumptions

The Holding Company provides for gratuity liability based on the actuarial valuation done by the independent actuary valuer and is funded. The present value of the defined benefit obligation and the related current service cost were measured using the Projected Unit Credit Method, with actuarial valuations being carried out at as on balance sheet date.

Principal assumptions used for the purpose of actuarial valuations were as follows: (Holding Company)

Particulars	31st March 2023
Discount rate(s)	7.58%
Expected Return on Assets	7.49%
Salary escalation rate	5.00%
Attrition rate	5.00%
Mortality	Indian Assured Lives Mortality (2012-14)

The Subsidiary Company provides for gratuity liability based on the actuarial valuation done by the independent actuary valuer and is unfunded. The present value of the defined benefit obligation and the related current service cost were measured using the Projected Unit Credit Method, with actuarial valuations being carried out at as on balance sheet date.

Milky Mist Dairy Food Limited

₹ in million

(Formerly Known as "Milky Mist Dairy Food Private Limited")

Notes to the Special Purpose Consolidated Financial Information for the year ended 31st March 2023

(Amount in million of INR unless otherwise stated)

Principal assumptions used for the purpose of actuarial valuations were as follows: (Subsidiary Company)

Particulars	31st March 2023
Discount rate(s)	7.52%
Expected Return on Assets	0.00%
Salary escalation rate	5.00%
Attrition rate	10.00%
Mortality	Indian Assured Lives Mortality (2012-14)

b) Amount recognised in the Statement of Profit and Loss in respect of these defined benefit plans are as follows:

Particulars	31st March 2023
Current Service Cost	7.29
Net Interest on Defined Benefit Obligation	1.31
Expenses recognised in the statement of profit and loss	8.60

c) Amount recognised in Other Comprehensive income for the year

Particulars	31st March 2023
Return on plan assets	0.03
Actuarial gains/losses arising from changes in demographic assumptions	-
Actuarial gains/losses arising from changes in financial assumptions	(0.18)
Actuarial gains/losses arising from experience adjustments	0.18
Amount recognised in OCI for the current period	0.03

d) Movement in the present value of the defined benefit obligation are as follows

Particulars	31st March 2023
Defined benefit obligation as at the beginning of the year	19.60
Current service cost	7.29
Net Interest on Defined Benefit Obligation	1.43
Actuarial gains/losses arising from changes in demographic assumptions	-
Actuarial gains/losses arising from changes in financial assumptions	(0.18)
Actuarial gains/losses arising from experience adjustments	0.18
Benefits paid	(1.06)
Defined benefit obligation as at the end of the year	27.26

Milky Mist Dairy Food Limited

₹ in million

(Formerly Known as "Milky Mist Dairy Food Private Limited")

Notes to the Special Purpose Consolidated Financial Information for the year ended 31st March 2023

(Amount in million of INR unless otherwise stated)

e) Change in fair value of plan assets

Particulars	31st March 2023
Fair value of plan assets as at the beginning of the year	-
Expected return on Plan Assets	0.12
Employer Contributions	3.16
Benefits paid	-
Actuarial Gain/(Loss) on Plan Assets	(0.03)
Fair value of plan assets as at the end of the year	3.25

f) Net Liability recognised in the Balance sheet

Particulars	31st March 2023
Defined benefit obligation	27.26
Fair value of plan assets	(3.25)
Amount recognised (Liability)	24.01
- Non Current	13.12
- Current	10.89

g) Sensitivity analysis

Below is the sensitivity analysis determined for significant actuarial assumption for the determination of defined benefit obligation and based on reasonably possible changes in the respective assumptions occurring at the end of the reporting period while holding all other assumptions constant

Particulars	31st March 2023
Discount Rate	
Discount rate + 100 basis points	25.20
Discount rate - 100 basis points	29.66
Salary escalation rate + 1%	29.46
Salary escalation rate - 1%	25.36
Attrition rate + 1%	27.51
Attrition rate - 1%	26.96

The sensitivity analysis presented above may not be representative of the actual change in the defined benefit obligation as it is unlikely that the change in the assumptions would occur in isolation of one another as some of the assumptions may be correlated.

h) The expected future contribution and estimated future benefit payments from the fund are as follows:

Particulars	₹ in million
Year 1	1.61
Year 2	1.28
Year 3	1.49
Year 4	1.20
Year 5	0.82
Year 6 to 10	5.24
Above 10 Years	15.98

C) Compensated absences :

The expected cost of accumulating compensated absences is determined by actuarial valuation performed by an independent actuary at each balance sheet date using Projected Unit Credit method on the additional amount expected to be paid/availed as a result of the unused entitlement that has accumulated at the balance sheet date.

Acquisition of 100% common stock of Asal Food Products Private Limited, India

During the year ended 31 March 2025, the Holding Company has acquired 100% common stock of Asal Food Products Private Limited ("Acquired Company") through a share purchase agreement dated 29.03.2025. Pursuant to the said acquisition, the Acquired Company became a wholly owned subsidiary of the Holding Company. The consideration to the selling shareholders has been agreed at ₹ 71.25 million and is reflected as purchase consideration payable for business acquisition at the end of the financial year. The Group has recognised an amount of ₹ 56.25 million in the Common control adjustment deficit account with respect to the aforesaid acquisition which is in excess of net assets and reserves taken over. The purchase consideration is payable in cash and is current in nature. As per the requirements of Appendix C of Ind AS 103 Business Combination, the Group is required to restate the prior periods as if the business combination had occurred from the beginning of the preceding period in the financial statements and if business combination had occurred after that date, the prior period information shall be restated only from that date. Accordingly, the Group has recorded purchase consideration payable in earlier periods. The Group has not fair valued the consideration in earlier periods as the restatement is a disclosure requirement under appendix C of Ind AS 103 Business Combination.

The acquisition referred to above, being a "common control" transaction, has been accounted as per 'Pooling of Interest' method as prescribed under Appendix C of Ind AS 103 - "Business Combination". In accordance with the requirements of para 9 (iii) of Appendix C to Ind AS 103, the financial statements of the Company in respect of the prior period have been restated as if acquisition had occurred from the beginning of the preceding period presented i.e., 01 April 2022 irrespective of the actual date of the combination, the impact of which is detailed below:
